

The following index includes all of the Gospel parallels found in the Peshitta canon tables. References standing alone are those that appear in the tables numbered 10, which are without parallels in the other Gospels. Footnotes indicate, for numerous difficult cases, the transitions between subdivisions of verses, in both the Greek text and the NRSV. The footnotes in this first section are given only for the primary parallel per line; the footnotes are also provided for the full section lists at the end of the document. The verse numbering follows the Greek text.
